"Stop Mononucleosis Dead in its Tracks". How an Amazing Discovery by a Naturopath Helps You Say Goodbye To Painful Sore Throats, Swollen Glands, Debilitating Fatigue And Aching Muscles Once And For All!

Finally, Who Else Wants To Stop Mononucleosis, Quickly and Easily, By Unleashing the Amazing Power Of Their Immune System....Without Using Dangerous Drugs?

Can you see your new future without the debilitating effects of mononucleosis?

Imagine, waking up in the morning with energy to burn. You feel alive, rested... with a spring in your step. You jump out of bed eager to face the day ahead. You're looking forward to breakfast because your throat is perfectly fine and clear. You power through your day with an alert mind and a new zest for living. Imagine the freedom you'll feel. At night you fall into a deep, rejuvenating sleep that fully refreshes your mind and body.

You can now get my proven step-by-step strategy for banishing mononucleosis quickly and easily, and keeping it at bay once and for all.

What others are saying:

"My first diagnosis for mononucleosis was in August of 2006. I couldn't get out of bed at all. I just couldn't function. I had a chronic headache. Very, very severe fatigue - just couldn't get out of bed. I felt like I had the flu. I wasn't vomiting, but I just had chronic nausea 24 hours a day.

And I was ill for I'd say about eight months, until, I went online and I found Liz Noble's website and I purchased her e-book and started following her suggestions.

Of course, I e-mailed her and she told me what other supplements to take. And within, I'd say it was in a week or so, I just started to feel more energetic. I just started to feel better. I can't believe that now I feel I can hop out of bed. I am now functioning every single day.

And, it's just a great feeling. I'm able to go out. I'm able to see my friends. I'm able to do things with my family. I'm able to have picnics. I just love to go outside. I love to look at my yard. I love to look at my flowers. The birds...I love every single day. And I just don't sweat the small stuff. I really just appreciate every day that God gives me.

I can't thank Liz enough. She is just an inspiration and I tell everybody. She just gave me my life back."

Arlene, New Brunswick, New Jersey

Dear Friend,

If you're sick and tired of feeling miserable and run down, if your throat is red raw and swollen and you've finally had a gut full of mononucleosis... then this could be the most important letter you've read all year.

Here's why...

There is now a safe and easy way to stop mononucleosis in its tracks... without undergoing expensive treatment and without taking a fistful of drugs either.

My name's Elizabeth Noble and I'm a qualified naturopath. And I know first hand just how terrible it can be to suffer from the relentless pain of mononucleosis or glandular fever.

Several years ago, I was where you are now...feeling sick. Tired. Vulnerable. And angry because I couldn't seem to get over my mononucleosis symptoms.

Before I became a naturopath, I was a long-term mononucleosis sufferer. I was diagnosed with the active Epstein Barr virus, which causes mononucleosis, as a child, and then again in my late teens.

I never seemed to get over it - suffering from recurrent sore throats, swollen glands and fatigue. Sometimes the pain in my throat was so bad it felt like I was swallowing broken glass. I hated the constant irritation and discomfort. The horrible pain when I swallowed. The yucky feeling of mucous stuck at the back of my throat.

I disliked the tender, swollen glands in my neck. The hoarseness of losing my voice. The pain that made it impossible to sleep well at night. And waking up with a throat so parched that I could hardly talk.

I also suffered ongoing fatigue. I could not get through a day without collapsing into bed during the day to sleep. Sometimes I pushed myself and dragged my feet through a day, but I ended up spending the next day in bed to recover.

In most cases my mononucleosis symptoms did not progress any further. But sometimes it seemed to develop into a thick, mucousy cold accompanied by headaches, runny nose, aching muscles and a racking cough. Occasionally it ended up in serious bronchitis. A couple of times I got pneumonia which made me feel like I'd been hit by a bus, and which took me months to get over.

I was baffled by what caused my recurrent mononucleosis...

My doctors did not seem to have a clue. I was sent on a futile merry-go-round of doctors appointments, medical tests, antibiotics and dangerous drugs.

Some medications made me as sick as a dog with pounding migraines, nausea, vomiting, sleeplessness, thrush and bright red skin rashes. Some drugs would give me relief for a few hours, then the inevitable sore throats, swollen glands and fatigue would return.

I fiercely yearned for some kind of diagnosis and offer of a cure. I was worried why my body had let me down.

Does this sound familiar to you?

Are you fed up with suffering from mononucleosis?

- Do you have to get better fast for your work, studies or family commitments?
- Do you hate the idea of going to work, school or university feeling sick?

- Are you worried about the overwhelming amount of work or exams you'll have to catch up with?
- Do you dread having to answer the phone or chat socially because your throat hurts?
- Do you feel agitated that you can't shake your annoying mononucleosis symptoms and jump back on the bandwagon of life and work?
- Do you despair at missing out on family activities and fun things you really want to do?
- Do you feel inadequate and guilty that your body has let you down?
- Are you terrified that your mononucleosis could end up as chronic fatigue syndrome or worse?

You are not alone! Mononucleosis can be a time of significant physical suffering, great uncertainty, frustration and distress.

Many mononucleosis sufferers experience great loss, forced to endure shattered hopes and dreams. There is also great strain on relationships. Mononucleosis can be a disaster for your social life. No one wants to date or be around someone with mono. The boss or colleagues may resent your frequent sick days. Your family and friends may complain that you seem detached, irritable or uncooperative.

Mononucleosis sufferers are often driven into silence, resentment, anger and depression. I believe that these frustrations and blocks are only something that a true mononucleosis sufferer can understand.

Thank you so much for your kind help and encouragement at a very discouraging time.

It is so inspiring to know that you were able to heal yourself from your infectious mononucleosis. Maybe if you could, I can too.

I was able to open and print your wonderful e book. I just wished I had ordered it months ago! I have known for two and a half years that I have been under too much stress and extremely unhappy with my life. Hmmmm, it looks like I need to change it, as scary as it might be ...

Your e book is helping me focus on very practical strategies, i.e. vitamins, herbs, affirmations etc. and it continues to give me hope. I feel like the riddle of my ailments has finally been solved. I have learned so much from you. Again, it is such a huge help to be able to communicate with you.

With lots of gratitude for your help and kindness!!! And thank you so much for taking the time to read my story!!! Your help has been so invaluable. You made me feel supported and normal in a crazy situation.

All the best to you.

Regina Y, Missouri, United States

My experience with mononucleosis motivated me to research its causes and treatments.

I spent years poring over library books, studying research papers and looking up medical journals for the latest breakthrough information. I interviewed doctors and natural health experts, and quizzed hundreds of patients on their success stories.

I was on a quest, a journey, a search to rid myself of mononucleosis once and for all. I threw my heart and soul into it.

I learnt that conventional drugs did not address the causes of mononucleosis. In many cases, drugs are immune draining and damaging to your health. The standard medical advice is often to go home and rest - even if it takes weeks, months or years!

In my desperation I researched and tried every alternative health therapy I could get my hands on, including:

- Acupuncture
- Allergy programs
- Ayurvedic diets
- Bowel cleanses
- Chinese herbs
- Chiropractic
- Elimination diets
- Hair mineral tests
- Homeopathy
- Hypnotherapy
- Hydrotherapy
- Intravenous glutathione
- Intravenous vitamin C
- Massage
- Mercury removal
- Meditation
- Oxygen therapy
- Physiotherapy
- Reiki
- Vitamin and mineral therapy
- Western herbs
- Yoga

I passionately put what I'd learnt into practice. I tried and tested everything. What worked I kept. What didn't work, I'd throw out in the garbage.

After much persistence, I began to unlock the secret cures of mononucleosis. I learned about many very **simple natural remedies** that start to work on the painful mononucleosis symptoms almost immediately. The pieces of the puzzle slowly fell into place, and finally everything made sense.

The improvement I experienced in my own health was phenomenal. I had an overwhelming sense of relief that my energy and vigor were returning. It was liberating. I felt the sheer joy of living again. I was profoundly grateful to be able to take long walks in the sunshine and fresh air, and spend quality time with my family and friends again.

But I did not stop there. My search for natural health cures lead me to my career as a qualified naturopath, and Director of the Wholistic Therapy Centre.

I treated many patients with heart-wrenching stories of suffering mononucleosis and chronic fatigue. I used what I learnt in my research and my own experience with sensational results. The amazing accolades from my patients was even more satisfying than my own progress. Patients were able to get on with a life of health, vigor, productivity, decent relationships and following their dreams.

Your e-book is awesome, stunning, brilliant..... I am so thoroughly impressed!!!!

I'm thrilled to report that my glands and strange throat are subsiding - don't feel like I'm being throttled anymore...I'm improving without a doubt.

Thank you Elizabeth for sharing this book with us, at least we know what we are dealing with and there is hope for a full recovery. It's a whole different thing when you share with someone who has actually suffered with chronic mononucleosis. That's why I love your e-book, you've been there and address it magnificently, and as you say, you know what works and what doesn't.

God Bless, **Carol G, South Africa**

Finally - there is a solution to the pain of mononucleosis...

My program is now available to you in an e-book and support program called "Nature's Amazing Mononucleosis Cures".

This is the exact formula that has worked for me and hundreds of my patients. It reveals all the secrets of how to supercharge your immune system and banish mononucleosis once and for all!

If you want a solution that doesn't take six years to figure out, and cost thousands of dollars, then this is the solution for you.

This is great. Thank you. This book is excellent. Our son was just diagnosed with the mononucleosis virus and I have done a lot of web research. Your information is by far the most comprehensive and constructive information available.

Again, many thanks for this roadmap to good health. I am off now to the vitamin store to stock up on your recommended daily regiment.

Here's what others say about the Mononucleosis Support Program:

"The program was worth every penny just to get Elizabeth..."

"Elizabeth is the most amazing support system. She really is. She is fantastic. I don't know what I would have done without her.

I would email Elizabeth every couple of days and she would get back with a very focused, non-panic letter, just telling me why don't I try this, and why don't I try that. She understands. The program was worth every penny just to get Elizabeth. She was invaluable.

I can't thank her enough. Because she was the one constant I had right the way through. Elizabeth is such an incredible authority on this disease, and the world is better because of her".

Debi, South Africa

"Wow...what a journey of discovery it's been..."

I've had amazing results and life changing experiences from Elizabeth's e-book and e-classes. Wow what a journey of discovery it's been. I'd have to say though, that my favorite part of this experience was receiving the classes and putting into practice what I'd learned.

Isaac, New Zealand

"Your support site is so well designed and informative..."

"I am so pleased to see your newly launched support site is so well designed and informative. I'm sure the members will greatly benefit from these e-classes as I have this year.

I am now almost back to full strength having worked full time for sometime. The regular exercise and the everyday healthcare knowledge learnt from your program all help. Best Wishes to the program!"

Dr Liang L, Swindon UK

"This program has been a breakthrough for me..."

"For years I was so sick. I did not even know what was going on with me. I thought this was a dead end for me. But I was completely wrong.

This program has been a breakthrough for me. When I came across Elizabeth's program I thought it was just amazing. I mean this lady had it, she's cured, she knows what she is talking about. It's like she has been in my own shoes. She's right that having no support just makes your symptoms worse.

I have learnt so much from her program. That was a really wonderful tool for me to use. I just keep getting better and better. I know I will get cured completely. It has given me so much hope and so much confidence."

College student heals her friends:

"For my college daughter with infectious mononucleosis, we took your advice with the supplements and all the other ideas. I really feel that the mononucleosis virus left her rather quickly . She really only suffered about 2 weeks. I would say that it was your advice that turned this thing around.

She wound up with a 4.0 on the deans star list! All her close friends came down with infectious mononucleosis too and she passed the advice on to them, which seem to help them also. Thank you this could of been a disaster as I almost felt that I was going to have to pull her out of college. Maybe you even saved her career.

What I like most of all, is that this kid learned that there is another way to cure problems and she passed the cures on to others. She will be working in the health field maybe as a Pharmacist, so who knows how many lives you have affected in the future.

Thank you again for your wonderful information. The regular doctors had nothing to offer. I can't believe that they don't know about these ideas.

Thank you." **John C, Bangor PA, United States**

11 year old boy makes speedy recovery:

"Thank you for your well-compiled e-books. I find them compactly informative. My 11-year old son was diagnosed with the mononucleosis virus after 3 days of high fever (39-40°C).

2 weeks later I am glad to report that my son seems to be completely back to his old self. The day after our last email (day 9 from first fever), he started eating skinless roasted chicken with no ill effects. After 4 more days we had a big family Sunday lunch and he was back to eating "normally". He does not seem to be lethargic at all. I don't know if it is common for children his age to recover so quickly!

Thank you very much for your support!"

Elsemarie W. Pretoria, South Africa.

Sport-mad 10 year-old boy makes full recovery:

"Thank you, thank you, thank you for your rapid replies! I cannot begin to thank you for all of your support. You have no idea how much this means to our family.

For 2 weeks my 10 year old son with mononucleosis had a runny nose, sore throat and low fever, (100 F). His eyes did not look good and he was very pale. He couldn't wait to return to school and his beloved hockey.

I really noticed a difference with my son once he started taking the recommended amounts of vitamins and minerals you suggested. Within a week of taking them I noticed a HUGE improvement in his eyes!

On November 24 he had a series of tests. His blood work was very good. He was not anemic, his liver enzymes were good, his mononucleosis count good but his white blood cells were a little low. The chest x-ray was clear. He has been eating great! He returned to school on Nov. 27, and hockey on Nov. 30. Our coach has eased him back into it.

Thank you so much again for your time and support. I credit you with getting Tyler back on the path to good health!"

Sincerely.

Chronic mononucleosis sufferer finds hope:

"I am 39 years of age and have been suffering from the mononucleosis virus for almost 12 months. Since contracting mononucleosis in January 2006, I have come close to losing my family, my business and my mind. In recent times I have contemplated suicide.

There seemed no way out. I had tried everything.

Then the other week I was at the Chemist and a lady called Wendy was kind enough to tell me to look on the internet. Never thought of that! I did and found your book. For the first time in a long time I felt "normal" and at peace.

Thank you so much!"

I feel like I have my life back...

My name is Shani. I've been sick with mono on and off for about 3 years, and during my last "on" time, I read your book and started taking the vitamins you told me about.

At first, the vitamins didn't help at all but some weeks later I realized that my throat wasn't hurting me, and that some of the other things that come with mono had stopped.

Normally, when I had a recurrence of mono, I would slowly return to school and push myself until my energy level improved and I could drag myself through a daily routine.

This time was different. Instead of trying to muster my energy each time I wanted to do something, I had it there from those vitamins.

I am now making sure that I get the correct amount each day and also a nice amount of sleep (which comes much easier to me now).

I want to thank you for your book and the advice you gave me. I feel like I have my life back.

Thank you again! **Shani F, Baltimore MD USA**

When I stick to the diet my symptoms disappear

I have definitely made progress. This is the first winter that I did not catch a cold, everyone around me did but I did not get sick.

When I stick to the diet my symptoms disappear. The nutrients help a lot with my allergies and increase my energy levels tremendously. My skin looks much better and my eyes are not that yellow anymore. I will not allow stress to knock me down anymore. I stay calm and do what I can do and that's it. I sleep so much better!

Thank you for always responding so quickly on my e-mails. You are a true blessing.

I'm also losing weight which is an unexpected surprise!

Thank you so much for responding to my email. I've been so happy with your book as not only is my sore throat pretty much gone, but due to the changes in my diet I'm also losing weight which is an unexpected surprise!

Last week I was able to do my dancing (either rehearsals or classes) every day, except for Sunday, without feeling too bad. This is a HUGE improvement for me and one that raises my spirits as I live to dance!

I am taking all of the supplements you mentioned along with the protein diet and lots of water so it sounds like I'm on the right track.

And I'm only on my 2nd week of following your instructions so things are looking good!

Thanks, **Charis, MAROOCHYDORE, QLD Australia**

This book has helped us immensely...

Wow! Is all I can say! Thank you so much...not only for the prompt reply but for such a wonderful book. All three of my daughters were recently diagnosed with Mono, whereupon the doctor informed me that there was "nothing" that could be done. After much agony, I decided to try a natural approach. I feel very lucky to have found your company. This book has helped us immensely.

Again thank you and God Bless.

Sincerely, **Annette M, Howell, New Jersey USA**

Daniel finally returned to his weekend job and to school...

First, let me say thank you for the great and very informative book on mononucleosis. My son, Daniel, had been sick for about a week and a half with multiple trips to his Dr. with no help to ease the pain.

Normally a very active child he was prone to his bed and experiencing a lot of eye swelling and fevers. He also had diarrhea and coughing up blood-tinged mucus. He did not want to eat and was beginning to look like this was taking an awful toll on his body.

After starting him on a multivitamin and about everything else listed in the book, I just wanted you to know that Daniel finally returned to his weekend job and to school.

Thank you for answering my questions quickly. I learned so much about using the holistic approach when ill. I truly felt you were there for me whenever I needed extra support. I know we will never meet face to face but I consider you a friend.

Always,
